

Paper template for #200 series

Try these other configurations by combining this pattern with #100 and #300 series kits.

One kit contains 12 triangles.

Print multiple pages. Do not scale. (Print 1:1). Cut and lay out on your project surface to see how many kits you need to order. Cut end shapes in half for straight edges

Placing the order for all kits at once will ensure they are cut from the same batch of wood with the least color variation.
